

## **JD – Warehouse and Logistics Manager**

The Warehouse and Logistics Manager role ensures the successful storage and distribution of Oryx products. This role aids timely installations through the correct delivery of products to the site, guaranteeing that projects are completed on time every time with a focus on the Oryx Way of Management and Lean principles.

### **Role and Responsibilities**

- Lean processes and continual improvement
- Maintain optimal stock levels of consumables and operational spares
- Enable proper storage and distribution of raw materials and finished goods
- Supervise and manage the drivers and warehouse staff
- Oversee the planning of material distribution

### **Required Personal Attributes**

You should be well groomed, with exceptional personal hygiene and attention to detail in your appearance. You should also be happy, have excellent relationship-building skills, be flexible, and be positive. It is a prerequisite to take care of your mental and physical health in addition to learning and continually improving yourself. Must have a driving license and be able to communicate clearly and effectively in English.

### **The values of our business are to be:**

Resourceful, Responsive, Trusted, Innovative, Considerate, and Premium—these, together with Lean, form the basis of our operation.
